SERVICES & SOLUTIONS PORTFOLIO

CLOUD ADOPTION

Be the agent for innovation with Aufsite's experts assisting you in deploying a modern solution that eliminates IT disruptions and more.

COST OPTIMIZATION

Traceability, predictability and control. The three levers in achieving total governance while meeting business demands.

SECURITY OPTIMIZATION

Identity foundation, detection, infrastructure and data protection—the keys to maintaining a proper security posture.

CLOUD SUPPORT SERVICES

Not just a responsive team, but a proactive team that focuses on enhancing every aspect of your experience through innovation and automation.

CLOUD PC'S

A high quality desktop experience with the ability to access from anywhere, on any device, in a highly secure manner.

MICROSOFT 365

Tools to enhance collaboration, agility and over all experience.

CLOUD ADOPTION

Be the agent for innovation with Aufsite's experts assisting you in deploying a modern solution that eliminates IT disruptions and more.

The right recipe...

- The key to a successful migration is having the right strategy. Moving enterprise data and applications outside the firewall and into the cloud is no small feat. It typically encompasses costs, tools, security, governance and talent among other considerations.
- Being cloud platform provider agnostic, Aufsite understands the requirements that each client has. We work together to determine which provider, whether it is Amazon Web Services (AWS), Microsoft Azure, or Google Cloud Platform (GCP). This objective viewpoint enables Aufsite to cater the solution to meet the clients' demands for a successful project delivery.
- The experts at Aufsite can help by asking the right questions to determine how and if its feasible for you to move to the cloud. Because let's face it, even though the promise of improved flexibility and scalability makes the cloud seem like a can't-miss venture, not every application is right for the cloud. Email us at sales@aufsite.com and ask about our discovery process.

Infrastructure

Lifting and shifting is the absolute wrong approach. That's why you need subject matter experts to do a thorough discovery of your environment to see how your existing infrastructure needs to change to adopt cloud in a manner that allows for scalability, security, resilience and automation.

Our Aufsite experts will help tailor your solution so that you are able to take full advantage of cloud.

Applications

Running applications in the cloud is the easy part. Usability and management is where having the right configuration matters. Enabling access to cloud applications in a secure manner while utilizing cloud native authorization/authentication providers is an involved process. If your team is developing applications and managing them then you have another layer of complexity that should be done the right way otherwise you are building technical debt that will be hard to dig out of.

Our experts can help your team deploy your applications while future-proofing them.

Data

Your data is the heart of your business and it should be treated as such. With so many choices in cloud storage, which one is right for you? Accessibility, responsiveness and capacity, amongst other critical details all play a role in deciding which platform to use. Making the wrong choice can cause unnecessary expenditures.

Our experts have worked with clients with requirements for big data and small. They can help you make the right decision the first time and future-proof your growth.

COST AND SECURITY OPTIMIZATION

Traceability, predictability and control. The three levers in achieving total governance while meeting business demands.

Planning is everything...

➤ Business Process Management & Strategy

Detecting weaknesses and threats and proactively mitigating them through controls and processes is no easy task but maintaining and updating risk management and a compliance strategy is essential to ensure your business continues to function soundly.

We deliver services that will help you align with your risk and compliance requirements while maintaining functionality so that you can sleep better at night.

➤ Subject Matter Experts

Aufsite provides an experienced team of Security & Compliance subject matter experts to analyze your environment and make recommendations on improvements based on gaps or weaknesses in process to either achieve or maintain compliance. Aufsite offers a suite of services to help businesses take their processes, security and compliance to the next level. Contact us for an evaluation of your processes.

Cost Optimization

Our process is based on best practice and it will help our clients build and operate cost-aware workloads that achieve business outcomes while minimizing costs and allowing their small business to maximize its return on investment.

What's included:

- Assess – We'll perform a thorough analysis on all components in your workload and advise on the best approach
- Notifications – Set up notifications for when costs or usage is outside of defined limits
- Reports – We'll work with your team to create reports to summarize all costs and usage information
- Forecasts – Provide the capability to show estimated future costs

Security Optimization

Our Security Optimization process guides our clients in taking advantage of cloud technologies to protect data, systems, and assets in a way that can improve their security posture. We provide in-depth, best-practice guidance for architecting secure workloads on the cloud.

What's included:

- Identity Foundation – We'll help you implement the principle of least privilege and enforce separation of duties and guide you to centralized identity management
- Detection – We'll help enable traceability by helping configure monitoring, alerting and audit actions
- Infrastructure Protection – Identify and apply defense in depth approach with multiple security controls at all layers (edge of network, VPC, load balancing, instances, operating system and applications)
- Data Protection – Understand encryption for data at rest and in transit and guide in implementation where possible

CLOUD SUPPORT SERVICES

Not just a responsive team, but a proactive one that focuses on enhancing every aspect of your experience through innovation and automation.

Seasoned Professionals

➤ Teaming up with Aufsite for your Cloud Support Services doesn't mean your only handing off your daily operations; it means you're onboarding SMEs who will work to understand your strategic IT programs and guide your initiatives effectively.

➤ Our experts can guide you in making the right decisions so you can avoid these failures by utilizing cloud best practices i.e. split-zoning and autoscaling. All systems are prone to failure, as a matter of fact, the best strategy for deploying a system is to do it knowing that it will fail. The key is to know how to overcome that failure with minimal to no downtime. We can help achieve that goal with the bottom line in mind.

- ✓ 5 Hours Support per month
- ✓ Business Hours Mon-Fri 9am-5pm EST
- ✓ Email Only
- ✓ Monthly Utilization Report
- ✓ Contract Length 1 Year

ESSENTIAL

ENTERPRISE

CLOUD PC'S

The ability to work from anywhere with any device in a secure manner.

Workspaces

➤ The proliferation of devices is significantly changing the IT landscape. Today's employees want a high quality desktop experience they can access from anywhere, on any of their devices. IT organizations who keep up with this transformation can reap significant benefits in employee engagement and productivity.

➤ Aufsite can help you enable your users to securely access their applications, documents and resources they need from anywhere, on virtually any mobile device. By keeping the data on the cloud instead of locally on user devices we can help improve your organization's security posture.

Bring Your Own Device (BYOD) and/or Aufsite Zero Client

- Windows
- Mac OS X
- Ipad
- Android Tablet
- Fire Tablet
- Web Access
- Chromebook

MICROSOFT 365

Microsoft 365

➤ Microsoft 365 has revolutionized the way businesses communicate. Having the cloud backed performance and simplifying the licensing process Microsoft 365 enables your organization to keep up with the latest available versions of Outlook and other Microsoft 365 products like Word, Excel, PowerPoint.

➤ It's not just about the mail. Microsoft 365 offers a suite of collaboration tools that enable your team to become truly agile. Engaging with Aufsite means bringing on a team that will tailor your migration, review your administrative processes, provide ways to make them more efficient and train your teams on best practices.

Implementation & Migration from Exchange on premises, G-Suite, Lotus Notes etc.

Why back up your Microsoft 365 data?

- ✓ Compliance
- ✓ Liability
- ✓ Audit Rights
- ✓ Vendor Lock-in

Microsoft 365 Backup

If your organization uses Microsoft 365, you might think that there is no risk of your data ever being lost. After all, Microsoft 365 is a widely used platform that's financially backed by Microsoft and has a guaranteed 99.9% uptime. However, there are important reasons to copy your data to a separate vault that resides within your area of control.
